

Alumid: large-scale formats for a unique style. Designed for screens with bases sized over 3.5 m, this model is equipped with the trademark built-in 108 mm diameter aluminium roller, contained in a case which is open underneath, for easy rolling of larger-scale screens. The result is an excellent tensioning of the projection surface. This product is also interesting from the installation point of view, which is based on the quick-assembly system, an operation which can be carried out autonomously and with significant time saving.

Sit back and enjoy the results: theatres, congress centres, auditorium spaces, Alumid ensures a striking projection performance even in the most challenging spaces.

Create your own screen with the PSS:

- > **personalized dimensions:** width and height
- > **roller type:** standard motorized
- > **case:** with standard case or without case
- > **case color:** available only in white
- > **projection surfaces:** VisionWhite, VisionWhitePro*, VisionGrey, VisionRear, VisionAcoustik and VisionMacroAcoustik, available with black borders except the VisionRear
