

Versatility, practicality, and above all efficiency and excellent performance: in the service and rental contexts, tools are fundamental and must fulfil all of these requirements. When it comes to screens, the solution is Easy, the surface designed especially for rental, and particularly for use with aluminium truss structures. Iron rods are inserted into dedicated hems along the four sides; in various points along the perimeter formed by these iron rods, elastic cables anchor the screen to the aluminium truss. This system prevents any warping or distortion of the projection surface: the traditional metal rings are but a remote memory. The tensioning can be further personalized through a choice of elastic cable sizes.

The product is sold with a kit of 20 cm elastic cables; kits for special installations are available on demand with 35 and 55 cm cables. In order to optimize the packaging and transportation of the screen, the iron rods to be inserted into the base are always divided into two halves; one-piece rods are also available for the other three sides, depending on the end user's individual requirements.

Create your own screen with the PSS:

- > **personalized dimensions:** width and height
- > **format:** 4:3 or 16:9
- > **projection surfaces:** VisionWhitePro, VisionGrey, VisionFold and VisionFoldRear

Standard accessories:

- > kit with 20 cm cables
- > wing screws

Optional accessories:

- > kit with 35 and 55 cm cables for special installations

Max dimensions for this canvas:

- > 1:1 format 7x7m max
- > 4:3 format 9x6.76m max
- > 16:9 format 12x6.77m max
